Relevant Experience

Product Analyst @ Central Piedmont Community College

April 2025 - Present // Charlotte, NC

- Support the planning, documentation, and delivery of software solutions aligned with institutional goals.
- Work cross-functionally with internal IT teams, vendors, and end users to coordinate product releases, resolve technical issues, and optimize user experiences.
- Support product planning and release coordination for platforms including Brightspace, Ellucian Colleague, Ethos API, Panopto, Informer, and Element 451.
- Create and maintain detailed documentation such as release notes, version histories, and user support materials.
- Collaborate with the IT Service Desk to troubleshoot and resolve software issues; document incidents and resolutions.
- Capture business and user requirements to ensure product features align with organizational goals.

Business Relationship Analyst @ Central Piedmont Community College

April 2024 - April 2025 // Charlotte, NC

- Built and fostered relationships with stakeholders to understand the technological needs of students, faculty, and staff.
- Created concise documentation based on stakeholders' needs to improve processes and implement technology solutions.
- Provided quality assurance to verify whether software and the project team were well-equipped to fulfill specific requirements.
- Collaborated with Solution Engineers (SEs) to develop and validate solutions that aligned with business goals and objectives.
- Applied data visualization and other visual modeling skills to capture and communicate information effectively.

Senior Software Analyst @ Canidium

Nov 2021 - Feb 2024 // Remote

- Wrote high-quality, scalable, and modern code for a diverse array of clients while managing multiple projects.
- Worked with a variety of programming languages and tools, including HTML, SQL, Groovy, ICM, Git, and Salesforce.
- Communicated and collaborated with Analysts, Project Managers, Consultants, and Clients.
- Led implementations and system upgrades by gathering and documenting business requirements and designs directly with Clients, Lead Consultants, and Analysts.

Software Analyst @ Encompass + Orchestra

May - Nov 2021 // Fort Collins, CO

- Interfaced with clients and daily, providing technological expertise and knowledge while supporting junior analyst.
- Traveled to job sites to build relations, deliver on site trainings and determine best practices for clients needs based on product usage.
- Built feature enhancements, custom reporting and implemented new solutions derived from customer needs and feedback using HTML, SASS and JavaScript.
